With elegant black, the classic waterproof protective case uses high-quality PP engineering plastics, makes the case substantial, and the performance of waterproof makes MEIJIA professional plastic classic waterproof protective case works well even in bad weather all year round. Those features meet people's requests all over the world.

MEIJIA professional plastic classic waterproof protective case Introduction
Model: MJ-138/1500-18.5"

In recent years, safety cases and safety protective cases have been widely used in military and police, photography, medical and other fields.

And the materials of safety cases and safety protective cases in China, at present, are mainly ABS plastics and modified PP engineering plastics. However, lacking sufficient elasticity, being brittle and relatively hard on the senses, the protective performance of ABS plastic is inferior to PP engineering plastics. PP engineering plastics improve the properties of flame retardancy, strength, impact resistance, toughness, etc., and are superior materials for the production of safety cases. Of course, the cost of PP material will be relatively high.

Although the product itself does not have an absolute price advantage, its wear resistance, drop resistance, and low temperature resistance are accepted by more people.
